Professional Summary

Computer Engineering undergraduate at Amrita Vishwa Vidyapeetham with strong foundations in Data Structures, Algorithms, and Linear Algebra. Experienced in Java, Python, and SQL, with a focus on building efficient and scalable software systems. Seeking Software Engineering Internship opportunities.

Education

Amrita Vishwa Vidyapeetham, Chennai

2024 – Present

B.Tech in Computer Engineering

Relevant Coursework: Data Structures, Algorithms, Linear Algebra, Object-Oriented Programming, Database Systems

Nightingale International School, Nepal

2022 – 2024

Higher Secondary (+2), Computer Science — **4.00 GPA (Top 3 Rank)**

Grade 10 — 3.70 GPA

Technical Skills

Programming: Python, Java (OOP), SQL, HTML, CSS

Core Concepts: Data Structures & Algorithms, OOP, Time & Space Complexity

Mathematics: Linear Algebra (Eigenvalues, QR Decomposition, Orthogonality)

Database: MySQL

Tools: Git (Basic), VS Code

Projects

Data Structures & Algorithm Implementations

- Implemented stacks, queues, linked lists, trees, and recursion-based algorithms in Java.
- Solved 100+ algorithmic problems emphasizing optimization and complexity analysis.
- Applied OOP principles to develop modular and reusable code.

Relational Database Mini Project

- Designed normalized relational database schema.
- Developed SQL queries using JOIN, GROUP BY, and aggregation functions.
- Improved query efficiency through structured data modeling.

Certifications

Advanced Python Developer Training — Codingal

SQL Developer Certification — Codingal

Data Science Fundamentals — Codingal

Web Development Course — Codingal

Leadership

- Ranked Top 3 in Higher Secondary Education (4.00 GPA).
- Organized a school-wide talent show with 900+ attendees.

Interests

Competitive Programming, Artificial Intelligence, Backend Development
